

# Structured Cabling with IP Integration Services

# TexelSPL's Structured Cabling with IP Integration Services

Unmatched Engineering Expertise and Experience

Since 1983, TexelSPL has been designing and installing high-performance infrastructure cabling for voice, data, video and communication systems. As our clients have demanded more complex and sophisticated communication networks, we have been able to respond due to the experience and expertise of our account executives, engineers and technicians. No other network integration company can match our record of successful installations.

## Laying the Groundwork for Successful Collaborative Communication Networks

When you need the highest performance and reliability from a communication system, TexelSPL is your answer. As a division of SPL Integrated Solutions, the leading nationwide audio and video integrator, TexelSPL is in a unique position to ensure that you will receive the maximum return on your investment in communication technology.

In this era of convergence, TexelSPL recognizes that the performance of collaborative communication systems depend on the performance of the networks. Whether you need wireless, fiber, coax, cat-5/6/7 or 10G cabling for your operations, TexelSPL will partner with you to design and install the most effective network.

Our expertise and experience is an advantage at every step of the IP integration process, beginning with the earliest design and construction stages. As the project progresses and the audio/video and videoconferencing gear is integrated, our familiarity with your site and the technology becomes an invaluable resource.

Since TexelSPL offers the best in both structured cabling and integrated communication systems, our clients can rely on one company for all their communication solutions.

## Systems Designed, Engineered and Installed by TexelSPL

### Structured Cabling

- UTP/Coax/Fiber Optics
- Backbone

### Network Integration/Wireless

- LAN/WAN Optimization
- Network Management and Monitoring
- Internet Security

### Outside Plant

- Fiber/Coax/Copper
- Testing and Fault Isolation

### Special Systems

- RF Distribution
- Private CATV, CCTV
- Audio, Video, VTC
- Perimeter Security
- Point-to-Point Laser

## Building Success into the Infrastructure

TexelSPL has made a significant investment in our people, procedures and facilities to support the mission-critical requirements of our clients. Our capabilities include:

**BICSI Certified Engineers and Technicians** are the heart and soul and the main reason for TexelSPL's success.

**Project Management Teams** are assigned to each project and can include a project manager, foreman, lead technician and support technicians. The team works with Sales, Warehouse, Purchasing and Accounting to ensure the smooth, timely delivery of services to our clients.

**Outstanding Documentation** is recognized by TexelSPL as an essential part of the deliverables for every project.

**Network Hardware Support** for Nortel Networks and Cisco. Our technicians go through intense training to be qualified to install and service products from both Nortel Networks and Cisco.

**Systems Installation Certification** for the leading cable manufacturers.

**Maintenance and Support** is a top priority for TexelSPL. We have a fully equipped fleet of service vehicles and technicians are available 24x7 for emergency restorations. We are experts in moves, adds and changes to installed networks and provide customized maintenance plans to our clients to satisfy their specific service requirements.

*BICSI Platinum Prestige Contractor  
BICSI RCDD Engineers on Staff  
BICSI Certified Technicians on Staff*

*Authorized Reseller and Installer for:  
CommScope, SYSTIMAX, Uniprise, Belden/CDT, Cisco,  
Nortel Networks, Corning/Siecor, Panduit, Siemon,  
ADC, Aruba, Innerwireless, Molex, Leviton, AMP*

In addition to designing and installing infrastructure cabling networks, SPL is the leading nationwide integration company for collaborative communication systems, large-scale audio and video performance systems, and Managed Conferencing Services.

### Collaborative Communication Systems

At the forefront of the collaborative communications wave, SPL has successfully implemented enterprise-wide, real-time collaborative systems that have made meetings and events work at Fortune 100 corporations, educational institutions, and government agencies. More and more organizations are choosing SPL to improve productivity and reduce communication costs, whether across campus or around the world.

### Performance Systems

No integration company has more experience at installing large scale, audio and video performance systems than SPL. These systems enhance the experience at venues like professional sports stadiums and arenas, theaters, casinos, theme parks and museums. If we can install the speakers for a new NFL football stadium, imagine what we can do for your boardroom!

SPL is especially proud of the systems it has installed in numerous churches and worship spaces throughout the country.

### Managed Conferencing Services (MCS)

For your systems to successfully boost productivity and reduce costs, optimum performance is crucial. SPL's Managed Conferencing Services make the difference, ensuring that your equipment and systems function properly and providing immediate assistance when the unexpected happens. Our industry-leading service programs include onsite support, offsite support, or a mixture of both. Services include full-time on-site technicians, network design and consulting, a 24-hour international help desk, 24-hour break/fix support, and management reporting.
